## NEW SOUTH WALES : EMPLOYMENT AND UNEMPLOYMENT.

The following indexes, compiled by the Government Statistician of New South Wales, relate to *total employment and unemployment* in New South Wales. Owing to the incidence of enlistments and the repercussions of the industrial dispute in coal mines, it is not possible to compile an index of employment and unemployment for May, 1940, until further data are obtained.

Middle of month.	Percentage of all who are dependent on and available for employment—			
	Including full-time equivalent of part-time relief workers with employed.		Excluding full-time equivalent of part-time relief workers from employed.	
	Employed.	Unemployed.	Employed.	Unemployed.
1933—June .. .. .	74.4	25.6	73.5	26.5
1934—June .. .. .	80.5	19.5	77.8	22.2
1935—June .. .. .	85.9	14.1	83.1	16.9
1936—June .. .. .	89.3	10.7	87.1	12.9
1937—June .. .. .	93.5	6.5	92.3	7.7
1938—June .. .. .	96.1	3.9	95.1	4.9
1939—June .. .. .	93.7	6.3	92.6	7.4
1939—				
February .. .. .	94.4	5.6	93.3	6.7
March .. .. .	94.2	5.8	93.2	6.8
April .. .. .	94.6	5.4	93.5	6.5
May .. .. .	94.3	5.7	93.3	6.7
June .. .. .	93.7	6.3	92.6	7.4
July .. .. .	93.8	6.2	92.7	7.3
August .. .. .	93.5	6.5	92.4	7.6
September .. .. .	94.0	6.0	93.0	7.0
October .. .. .	95.0	5.0	94.1	5.9
November .. .. .	95.4	4.6	94.6	5.4
December(a) .. .. .	96.1	3.9	95.4	4.6
1940—				
January .. .. .	94.4	5.6	93.6	6.4
February .. .. .	95.1	4.9	94.4	5.6
March .. .. .	95.6	4.4	94.9	5.1
April .. .. .	94.0	6.0	93.3	6.7

(a) Adjusted to exclude casual seasonal assistants in retail stores.

### NOTES.

1. The index of employment is the ratio of the number in employment to the estimated number of wage earners available for employment. The index of unemployment is the residue, but both indexes are derived by modifying the Census ratios in accordance with subsequent changes in number in employment and number estimated to be available for employment.

2. "Number in employment" is virtually a direct record; "number of available wage earners" is an estimate derived by increasing the total wage earners in employment (plus unemployed) at the Census of 1933 in ratio to the annual increase in persons aged 15 to 64 years, separate calculations being made for the sexes, and allowance made for net immigration. In order to increase the degree of precision in the index, adjustment is made in the number of available wage earners thus estimated to allow for (a) increase in the proportion of females who are wage earners, (b) youths who were without occupation but were not recorded in the wage-earning group at the Census of 1933. Adjustment for seasonal variations in employment is not made except in respect of casual retail employees in December. Since the outbreak of war, adjustment is due on account of enlistments in naval, military and air forces, and on account of women and adolescents (not formerly of the wage-earning group), who have entered employment. Data for such adjustments are being sought.

3. At the Census of 1933, 15,142 persons, or 1.8 per cent. of total dependent on employment, were unemployed by reason of illness, accident, &c., or voluntarily. These are excluded from the indexes above, which relate to percentages of available wage earners employed and unemployed.

4. The percentages of unemployment shown above are approximations relating to all wage earners of both sexes. Separate estimates for males and females cannot be made from the data available.

## QUEENSLAND : EMPLOYMENT AND UNEMPLOYMENT.

The following table, compiled by the Queensland Bureau of Industry from census results, unemployed insurance contributions, workers' compensation records, and shop and factory returns, replaces that published in the Review prior to November, 1939. The table gives a comprehensive statement of all persons in work (other than relief work) in Queensland, whether as employees, employers, or independent workers. A full percentage of unemployment, covering the whole working population, is also shown; this percentage can be defined as the ratio of the number of persons seeking and capable of work and not in work, to the total of the working population.

### NUMBERS IN WORK AND PERCENTAGE OF UNEMPLOYMENT.

May	..	..	..	107,800	263,700	10,600	382,100	5.9

(a) These percentages are not comparable with percentages of unemployment in other tables of this Review, having been compiled on a different basis.

#### NOTES.

1. The statistics of working population compiled from census data have been adjusted.
2. Persons sick and those working for no wages as well as those incapable of or unwilling to accept manual employment of the type available have been excluded from the unemployed.
3. The figures shown for the three-monthly periods have been corrected for seasonal variation.

# TASMANIA : EMPLOYMENT.

The following table, compiled from the wages tax returns of private employers in respect of their employees, whether subject to or not subject to tax, and from returns of Commonwealth, State and Local Government employment, gives the best measure available of the course of *total employment* in Tasmania.

## NOTES.

1. For each month of 1937-38 and 1938-39 the figures in the table may be regarded as providing a virtually complete record of total employment based on final collected figures. They are a combination of monthly figures received currently and annually, covering both private and public employment. They are deficient only to the inappreciable extent that some relief and other intermittent workers and domestic workers in private homes are not covered by the monthly returns. On the other hand, to the extent that they embrace the majority of workers subject to intermittent employment over the whole year, they reflect fully the seasonal and all other influences upon employment in Tasmania.

2. For the months since June, 1939, the figures are estimates based upon the current monthly movements of all public authority employment and of about 44 per cent. of total private employment. For a given month the figure of total private employment of the corresponding month of the previous year is changed in the ratio of the change of the current figure of private employment. The indication of the position for all employment in Tasmania given by this technical procedure must be read in the light of other indications of current change.

A comparison of employment in retail stores in May, 1940 (the latest month for which figures are available for all States) with May, 1939, shows the following estimated percentage changes:—New South Wales, -0.8; Victoria, +2.8; Queensland, +1.8; South Australia, nil; Western Australia, +0.9; Tasmania, +8.2; Australia, +1.5 (or, taking account of the growth of employee population, +0.4).

## TRADE UNION UNEMPLOYMENT RETURNS.

The only regular records of unemployment available in comparable form over a considerable period are the quarterly percentages reported by trade unions to the Commonwealth Statistician. The membership of the reporting unions consists predominantly of males, and represents at present about 54 per cent. of the total trade union membership and about 20 per cent. of all wage and salary earners.

The percentages stated for New South Wales and Queensland differ from those given on previous pages partly because of differences in the field of employment covered, and partly because the trade union returns relate only to the position as it is known to the unions.

(a) Revised Series. These percentages, which replace those published prior to February, 1939, are based on the returns of reporting unions after excluding certain females from Class III. (Food, drink, &c.). The females excluded, although substantially all employed from January to March, are for the rest of the year not "unemployed" in the sense that they are seeking jobs unsuccessfully in their own industry. They are either employed in other occupations (e.g., paid domestic service) or are engaged in home duties.

(b) Revised.

### INDUSTRIAL GROUPS: CHANGE FROM NOVEMBER, 1939, TO FEBRUARY, 1940.

Manufacturing—I. Wood, furniture, &c., 13.4% to 6.7%; II. Engineering, metal works, &c., 6.8% to 5.5%; III. Food, drink and tobacco, &c., 16.6% to 14.5%; IV. Clothing, hats, boots, &c., 9.6% to 6.5%; V. Books, printing, &c., 3.6% to 4.7%; VI. Other Manufacturing, 9.3% to 7.9%; VII. Building, 9.2% to 10.4%; VIII. Mining, quarrying, &c., 15.4% to 8.6%; X. Land Transport, other than railway and tramway services, 7.7% to 7.3%; IX., XI., XII., XIII. and XIV. Other and Miscellaneous, 7.7% to 7.5%; All Groups, 9.3% to 7.9%.

## BALANCE OF OVERSEA TRADE.

In the following table the overseas trade of the Commonwealth in physical commodities has been set out in a form which distinguishes between the ordinary trade in commodities other than gold, those movements of gold which may be regarded as resulting from current Australian production, and those movements of gold which cannot be attributed to the fact that Australia is a gold-producing country. The balance of trade on "current" account (that is, including credits from gold produced rather than gold exported) is given in columns D and E. The total balance of trade, as officially recorded, is given by the total of columns D and F.

Out of the credits mentioned above, together with those accruing from other "invisible" sources and existing balances of "oversea funds", Australia has to provide for various recurrent charges incurred overseas, and some payments of a capital nature. Chief among the former are the overseas interest commitments of the Australian Governments and other public bodies, which for the present trade year are estimated at approximately £22,000,000 sterling.

£'000 Sterling.

## EXPORT PRICES AND EXPORT PRICE INDEX.

The following table shows the course of prices of seven of the more important Australian export commodities. The quotations are for units of standard grade, and hence do not reflect variations in the grades or qualities of the goods actually exported in each month. Index-numbers of the average level of export prices are included. They are compiled from the prices of 20 commodities, which constitute about 85 per cent. of all exports.

Monthly Weighted Averages.	Export Parities—Australian Currency.							General Export Price Index.

(a) Price in store. Cost of carriage from store to wharf is 0.125d. (b) Price fixed under Agreement with the British Government at 13.4375d. per lb., with an additional 0.94d. to cover costs from store to ship and administrative expenses. (c) Price fixed at 137s. 2d. per cwt. f.o.b. Australia. (d) Quotes from November onwards are approximate export prices comparable with those shown for previous months.

## EXPORT PRICE INDEX (CHANGING BASE).

In computing the monthly index-numbers given on the previous page, the prices are multiplied by the average quantities exported during a fairly recent and representative period. Hence, while they indicate satisfactorily the general trend of the market, they take no account of the relative quantities actually sold at the different prices ruling during each month. In consequence the index-numbers do not give an adequate indication of the significance of the price movements as they actually affected current sales. This is shown more accurately by the index-numbers (inclusive of gold) in the following table, in the computation of which the "quantity-multipliers" are changed each month. The index-numbers are designed solely for comparisons of current prices with those of the corresponding months, or periods of months, of the preceding year.

Base : Weighted Average Price Level in corresponding months of preceding year = 1,000.

Month.	Month stated compared with same month of preceding year.	Period of trade year ending in month stated compared with same period of preceding year.

# WHOLESALE PRICE INDEX.

## BASIC MATERIALS AND FOODSTUFFS.

The construction of this new index has been made possible by the collection of new data on prices and consumption. Both in contents and method of computation it differs from the Melbourne Index of General Wholesale Prices. The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

(Base : 1928-29 = 1,000.)

Period.	Metals and Coal.	Oils, Fats and Waxes.	Textiles.	Chem- icals.	Rubber and Hides.	Building Materials.	Foodstuffs and Tobacco.	Goods principally Imported.	Goods principally Home Produced.	All Groups.

(a) Revised.

# PRIMARY PRODUCTION PRICE INDEXES.

The annual index-numbers in the following table have been recomputed to the base 1928-29 = 1,000 from the revised series published in *Production Bulletin* No. 30. They are based in general on prices realized in the principal markets of the Commonwealth.

The monthly index-numbers (based on the nearest equivalent wholesale quotations) are intended progressively to forecast the point which the annual index-numbers will eventually reach, and to provide a preliminary figure for the latest full year pending the completion of the annual census of production. The preliminary index-numbers will be revised as each production census is completed.

(Base : 1928-29 = 1,000.)

May	..	..	1,232	890	1,093	739	1,091	991	1,091

(a) Compiled by the New South Wales Government Statistician. The index-numbers are based on the prices of the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales. They represent unweighted averages of the mean monthly prices per £ of paid-up capital. Adjustments are made where capital is written off or bonus shares issued. Recomputed from original base, par values.

May .. ..	(c)	1,200	572	1,449	1,079	859	973

(a) Compiled by the Stock Exchange of Melbourne. The index-numbers of ordinary shares are based on the prices of the shares of companies whose business is more or less national in character. They represent averages (weighted by paid-up capital, with adjustments in the case of bank shares) of the mean monthly prices on the Melbourne Stock Exchange. The preference share index-numbers are based on the reciprocals of average yields. Recomputed from original base, May, 1926.

(b) Compiled by the Queensland Bureau of Industry. The index-numbers are based on the prices of the ordinary shares of 21 representative Queensland companies, and the preference shares of three companies whose ordinary shares are inactive. The index-numbers represent unweighted averages. End-of-month values were used until December, 1930, and mean monthly values thereafter. Recomputed from original base, April, 1928.

(c) Not compiled.

## NOTES.

A. This column is the total of all series available continuously since 1928-29 for which information is at present collected at least quarterly. Columns G above and J on the next page are omitted as the information is not available for the earlier years, and column L on the next page is omitted because quarterly figures are not available.

F. Includes the Cities of Geelong West, Mildura and Warrnambool and the Towns of Horsham, Newtown and Chilwell, and Sale.

G. Includes the Cities of Ballarat, Bendigo and Geelong, and Shepparton Borough.

(a) Revised series, now based throughout on total production. (b) Includes all central generating stations. (c) The base for each month is the average sales in the corresponding months of the three years 1929 to 1931 ; i.e. seasonal variations are removed. Based on units of 3,412 B.T.U. (d) Estimated on the basis of production by the Electrolytic Zinc Company Ltd. (e) Subject to revision. (f) Not available for publication.

# MAINLAND STATE RAILWAYS : FREIGHT, PASSENGERS AND REVENUE.

The following table shows statistics of freight and passengers carried and of revenue earned on the five Mainland State Railways.

The daily average number of passenger journeys is obtained by dividing the monthly totals by the *total* number of days in the month.

Period.	Freight Carried.		Passenger Journeys Daily Average.	Gross Monthly Revenue.	Net Monthly Revenue.
	Net Ton Miles Daily Average.	Average haul per ton.			
	'000.	Miles.	'000.	£'000.	£'000.

(a) Figures not comparable with other months owing to the inclusion in some States of certain annual and other commitments in the expenditure figures for June.

# MAINLAND RAILWAYS: FREIGHT TONNAGES CARRIED.

The following table shows statistics of freight tonnages carried by the Mainland State and Commonwealth Railways.

The daily averages for freight tonnages are obtained by dividing monthly tonnages by the number of days in the month, excluding Sundays, Xmas Day and Good Friday.

Freight totals are obtained by adding together the total freight tonnages carried on the Commonwealth and State Railways and deducting the sum of the interstate tonnages carried in New South Wales and South Australia. This avoids double-counting except to a negligible extent.

Period.	Daily Average Net Tonnage Carried—Mainland State and Commonwealth Railways.									
	Total Tonnage Carried.		Coal and Coke.	Other Minerals.	Wheat.	Other Grain and Flour.	Wool.	Live-stock.	Fruit.	All Other.
	Index 1928-29 = 100.	Tons.

## WHOLESALE TRADE.

Some indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts, but care must be exercised in interpreting the figures. The returns do not relate to all wholesale trade, nor do they cover a constant proportion of all trade. The effects of legislative and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, although total recorded sales are affected in smaller degree by such changes. Insufficient information is available to enable adjustments to be made to the crude figures on this account. Except where such changes are indicated, the "preliminary" figures are fairly comparable with one another, but they are not directly comparable with the "final" figures.

An index of activity in New South Wales is afforded by monthly returns of the sales of 42 large factories.

(a) The Act came into operation on 18th August, 1930, the rate of tax being 2½ per cent. It was raised to 6 per cent. on 11th July, 1931, but was reduced to 5 per cent. on 26th October, 1933, and to 4 per cent. on 11th September, 1936. It was again raised to 5 per cent. on 22nd September, 1938, to 6 per cent. on 9th September, 1939, and to 8½ per cent. on 3rd May, 1940. With certain specified exemptions, all goods sold in Australia, including imports, are taxable. The list of exemptions was extended as from 11th July, 1931; 2nd September, 1932; 11th November, 1932; 27th October, 1933; 1st August, 1934; 13th December, 1934; 25th October, 1935; 26th September, 1936; 26th September, 1939; and 3rd June, 1940. (b) "Final" figures. (c) "Preliminary" figures.

## RETAIL TRADE.

Statistics of retail sales are collected in three States but are available for publication in only two, viz., New South Wales and Queensland. In New South Wales the Retail Traders Association Research Bureau, in co-operation with the Commonwealth Bank, collects returns from a number of large Sydney stores. In Queensland returns are collected by the Bureau of Industry from twelve large department stores in Brisbane and their branches in country towns. Because of the relatively rapid development of chain store business, it is uncertain to what extent the department store figures are representative of all retail trade.

(a) Includes Inscribed Deposit Stock of E.S. and A. and Queensland National Banks. (b) In computing the ratios the figures relating to the Rural Bank of New South Wales have been excluded. (c) Includes Short Term Loans, other than Treasury Bills of the Commonwealth Bank.

## BANK CLEARINGS.

In the absence of statistics of debits to customers' accounts, bank clearings form a useful index of the money-value of cheque payments. Since they do not include cheques deposited in the banks on which they are drawn, the figures are not exhaustive, and their comparability is sometimes impaired by the effects of banking amalgamations. Cheque clearings connected with the redemption or issue of Treasury Bills have been excluded from the following table, but adjustments have not been made for other sporadic transactions concerned with public finance.

Grand Total (a) ..	217,392	220,934	–3,542	231,993	234,187	–2,194

(a) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals exclude payments by the Commonwealth to the States on account of interest on States' debts, special grants and non-recurring grants. (b) Reductions in 1939–40 figures are largely due to the separation of the railway transactions from the Consolidated Revenue Fund, as prescribed by the Transport Act 1938, and to the allocation of Land Tax, Motor Tax and Motor Licence Fees, &c. to the Transport Commission.

## COMMONWEALTH AND STATES: SHORT TERM DEBT.(a)

AT 31ST MAY, 1940.

Where Redeemable.	Commonwealth Securities issued on behalf of—							
	Common- wealth.	New South Wales.	Victoria.	Queens- land.	South Australia.	Western Australia.	Tasmania.	Total,
	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
Australia .. .. .	33,488	2,535	2,168	3,535	5,380	10	47,116	
London .. .. .	3,970	9,965	5,885	..	3,816	2,998	491	27,125

(a) Excluding overdrafts. For debt redeemable in Australia the unit of currency is £1 Australian, in London £1 sterling.
